# iPad iPOS Device Setup

Steps to Setup iPad for POS

1. Open the Safari Browser on your iPad.

2. Type the Server IP address into the Safari address bar (contact Imagatec to obtain this if you do not have it). This will take you to the POS home page.

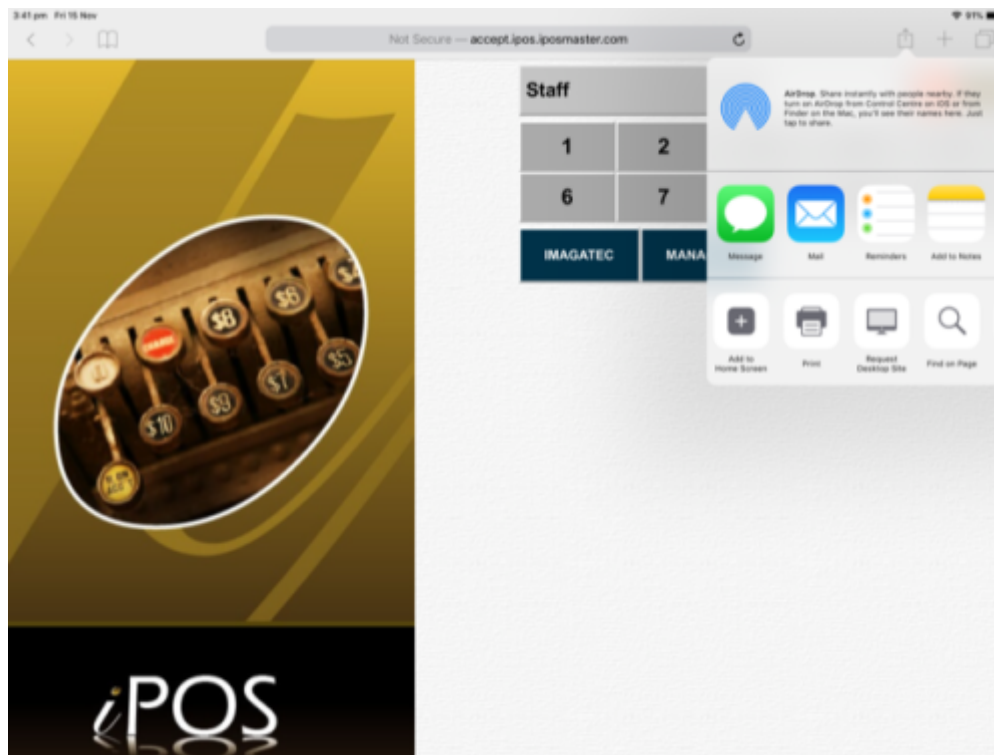

3. Press the Point of Sale button.

4. In the top right hand corner Find the icon with the Square and Arrow.

5. It will then give you the below menu, you will need to scroll the Gray section across until you find the button "Add To Home Screen"

6. Press add.

7. Close Safari and check the home screen, you should now have the application ready to go.

8. Test POS.

NOTE: Please note that the above guide will allow the iPads to take orders and to print to the default locations. For the iPad to be set up to print to a different printer they will need to be run up with the assistance of Imagatec - these run ups are chargeable at $25 each or at a discounted rate of $20 each if 2 or more iPads are run up at the same time.
