

iWASH - Core Commissions Feature

Many Car Washes pay commissions to the sales person on the driveway. We have built into the iWASH (Core) a feature that supports this.

There are 2 parts

- Rules
- Reports

Rules

In the Back Office

Administration > Products > Product Commissions

Select a Department

This lists all the products

Type in the \$ amount to be set as a the commission for selling this product.

Repeat for all products in this Department.

Click SAVE

Repeat for every Department.

Report

In the Back Office

Sales > Comparison Reporting > Sales Commissions

The rules are saved against the product, not transactions, so it does not save this historically. If you change the rules, the report will be based on the rules as it is now.
